

Data Structures (2025 Fall)

Assignment 04*

Chuang-Chieh Lin

Department of Computer Science and Engineering,
National Taiwan Ocean University

Due date: 27 December 2025

1. (20%) Give the inorder, preorder, postorder, and level-order traversals for the binary trees (a) and (b).

2. (25%) Compute the **generating function** for the number of ways of computing multiplications of n square matrices of the same shape.
Note: You should only give the closed form of the function.
3. (20%) A weighted directed graph G is given as follows. Filling in the given table using Dijkstra's algorithm to find shortest path from A to all nodes. If more than 1 vertices have the same minimum distance, choose the vertex with alphabet priority.

* List the required intermediate steps next to each problem. Note that any answers generated directly by AI are invalid for this assignment.
